Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2856

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyd- U.S. Patent # 5,575,832.

As to claims 1-4, Boyd discloses a filter clogging indicator 16 for detecting when the filter 14 is soiled including a chamber 38, with channel 11, lens 28, diaphragm 31 and vent 36, see Figs. 1-9 and col. 4, lines 50 et seq. Further, Boyd does not provide a “mark” on the surface of the diaphragm, per se. However, Boyd does provide a poppet having a red color which is moved by the diaphragm to provide an indication. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have defined the red colored poppet as a “mark” on the diaphragm since the image of the color is used as an indicator viewed through the lens. As to claim 2, provision of an additional connecting pipe is considered to have been an obvious matter of design choice to one of ordinary skill in the art to move the indicator out of the housing. As to claim 4, Boyd lacks a teaching for a lens shade. However, provision of a lens shade is considered to have been obvious to one of ordinary skill in the art at the time of the invention in order to protect the lens from damage or wear due to the environmental factors.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2856

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, on line 15, "the image" lacks antecedent basis.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional prior art cited on PTO-892 includes Chiu who discloses particle clogging detector for a filter cartridge or Cantoni who discloses a similar device for checking the degree of clogging of a filter.
